Chinese - Beginner

Spanish - Beginner

EXPERIENCE

Founder & Software Engineer - XIT

2020 to 2023

Founded, scaled, and successfully sold a web development company. Led end-to-end delivery across multiple client projects, owning architecture, implementation, and production handover.

Software Engineer (AI Automation) - Clean Controlling

January 2024 to November 2024 - Karlsruhe, Germany (Remote)

Built a Dockerized automation that compares vendor safety data sheet PDFs against local baselines, detects changes, generates an AI summary (Gemini), replaces stored versions, and emails stakeholders a concise diff report.

Startup Consulting - Retro Shift

October 2023 to February 2024 - Karlsruhe, Germany

Advised an early-stage smart energy startup on software architecture and analytics. Contributed to product decisions around dynamic electricity pricing and integration strategy for legacy devices.

Product Design & Engineering - Poddie

January 2022 to April 2022 - Karlsruhe, Germany

Designed and prototyped an interactive hardware software concept (potentiometer driven lighting / phone booth installation), combining physical controls, rapid iteration, and a user centric experience.
